SHORTER STAYS

Length of stay, cut across UCSF Health's 2M+ visits.

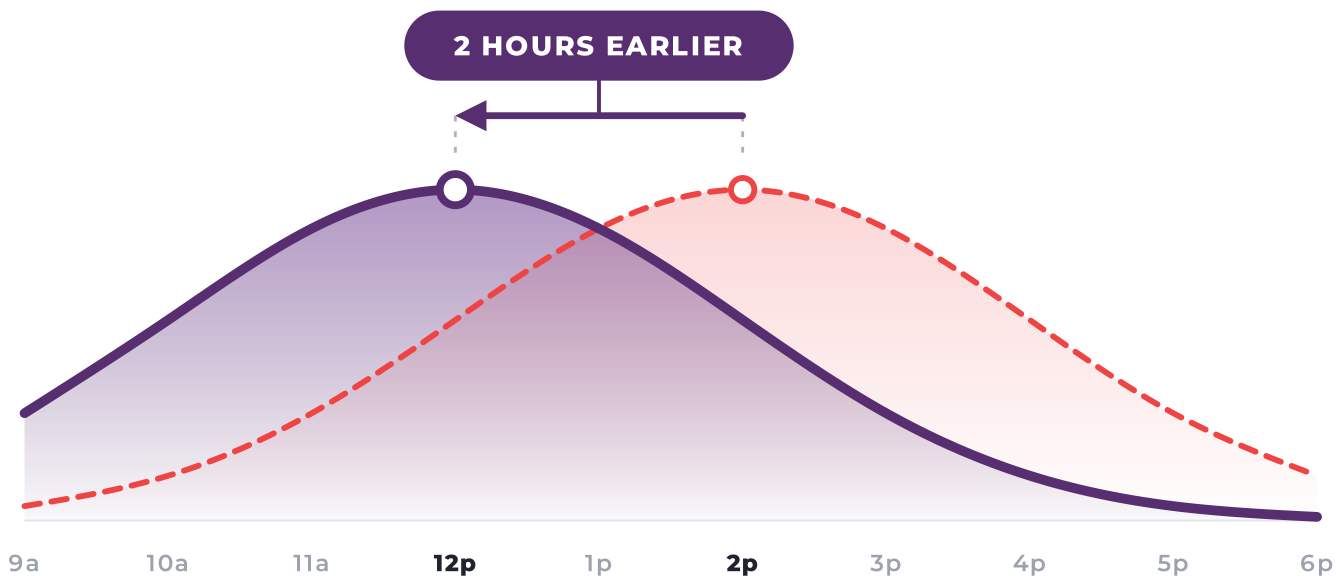

A transportation transformation that reduced length of stay system-wide, opened access to specialized care, and returned nearly 2,000 clinical hours to care teams.

● SURPASSED UCSF'S INTERNAL GOAL

When discharges happen

Hourly volume of patient discharges, before and after the Royal partnership.

— Before — With Royal

EARLIER DISCHARGES

2 HRS

Earlier average discharge time enabled by smoothed ride volume.

SAME-DAY TRANSFERS

99 %

Of long-distance (100+ mile) transfers now completed the same day.

HOURS SAVED ANNUALLY

1,947

Clinical time returned to care teams through onsite expediting.

“ I used to think of transportation as a barrier. Now it's a strength. Royal redefined what transportation means in healthcare.

Molly Shane, DNP, MS, BSN, RN

Executive Director of Care Management & Patient Transitions • UCSF Health

Five plays that transformed UCSF's patient movement.

Royal didn't deliver rides. They redesigned transportation as a clinical service, aligned to UCSF's throughput, capacity, and access priorities.

05
PLAYS

01

BEFORE

Discharges stacked up in the afternoon, delaying bed availability.

WITH ROYAL

Dedicated ambulances smoothed ride volume and enabled earlier discharges.

2 Hours

earlier average discharge time

02

BEFORE

Long-distance transfers (100+ miles) waited days for beds and rides to align.

WITH ROYAL

Custom workflows enabled same-day transfer as soon as beds became available.

99%

of transfers completed same-day

03

BEFORE

Transportation requests required repeated follow-ups from care teams.

WITH ROYAL

Onsite Royal team members expedited transport-dependent discharges in real time.

1,947 Hrs

returned to care teams annually

04

BEFORE

NICU patients faced limited access due to transport capacity constraints.

WITH ROYAL

Dedicated resources ensured timely access to UCSF's specialized NICU care.

+20%

increase in NICU admissions

05

BEFORE

Neuroscience transfers to UCSF were often delayed by sending hospital transport.

WITH ROYAL

Synced transport and transfers sped up access to UCSF Neuroscience care.

+25.7%

inbound Neuroscience transfers

"Royal didn't just solve our transportation problems, they redefined what transportation means in healthcare. I used to think of it as a barrier. Now it's a strength. Their team shows up like a true partner, with insight, strategy, and consistency."
